WORK EXPERIENCE

Full Stack Developer PHP
Ekiria I September 2024 - Present

I am currently developing Ekiria, an e-commerce platform that integrates product and service sales with a content-rich blog section. My primary focus is on creating an intuitive, user-centered experience while delivering tailor-made technical solutions that meet specific business needs.

This project involves implementing features such as catalog management, shopping cart functionality, payment gateway integration, and a dynamic blogging system. It also requires close collaboration between design, development, and strategic planning to ensure alignment with the client's vision.

Stack: React, PHP, Sass, Axios, MySQL, HTML.
AWS: RDS, CloudFront, S3 and API Gateway.

Full Stack Developer Java
Quinto Impacto IT I February 2023 - March 2025

I contributed to the development of back-end solutions in Java, focusing on designing efficient, scalable tools aimed at process optimization. I participated in key projects such as Papelería ER, digitizing and automating workflows, and COEF, an innovative application for construction management and inventory control used across Latin America.

In addition to implementing technical functionalities, I collaborated with multidisciplinary teams to ensure that solutions were aligned with business needs and client requirements.

Stack: Java, Angular, TypeScript, Node.js, CSS, HTML, JavaScript, Sass, Axios, Bootstrap, SpringBoot, PostgreSQL, Vue.js.

LANGUAGES

- English - Intermediate
- Spanish - Native
- Portuguese - Advanced

SKILLS

- RESTful API Development
- Component-Based Architecture
- Database Management
- Project Management
- Agile Methodologies & Scrum Knowledge
- Sprint Planning & Execution
- Experience with Jira & Trello
- Leadership & Team Motivation
- Teamwork & Collaboration
- Effective Communication
- Critical Thinking & Problem Solving
- Public Relations
- Time Management
